

Lanyon Total Access™

Simple, efficient, low-cost Web-based access to the Global Distribution Systems (GDSs)

With Lanyon Total Access you do not need a circuit to each GDS or even additional terminal emulation software. A standard Internet connection to Lanyon's hosted solution is all you need to reduce your overall GDS connectivity costs and the time and resources formerly needed to implement and manage GDS connectivity.

Connect to GDSs through a standard Internet connection

Do anything you would from a GDS terminal

The intuitive interface allows you to access your PNRs, work queues, add OSI messages, view and manage database content...and do anything else that you would otherwise do on a GDS display terminal. Powerful macro capabilities in LTA can make data management tasks much more efficient, eliminating repetitive keystrokes.

Comprehensive, easy-to-use administrative functions enable you to get the most out of your pool of GDS terminal addresses and minimize the number you need for each GDS. You can monitor usage of each terminal address, manage user connections, view current and historical user activity, log and review all traffic (all subject to the PCI rules), and configure and manage your user group.

Robust pooling capabilities eliminate the requirement for airline customers to purchase a GTID for each user for Apollo/Galileo sessions. As a result, your user group can access the same GTID or pool of GTIDs.

With LTA, you sign a single contract with Lanyon for all the supported GDSs on which you wish to use LTA. Our long-established set of GDS partnerships takes care of the rest.

Implementation of LTA is quick and easy as no system integration is required and pricing is very simple with just one price per terminal address per month.

Reliable

Lanyon is the recognized leader in content management and process improvement solutions for the hotel industry and their partners. From GDS rate publishing and productivity tools to the latest Internet innovations, Lanyon products can be found in major travel-related companies worldwide.

Compelling Benefits

- Lower costs
- Full control
- Rapid implementation
- Increased efficiency
- Single contract
- Simple pricing

Unique Features

- Connect to every GDS
- 24/7 availability
- Internet access is all that is needed
- Pooling capabilities
