

RatePublisher™

The complete solution for hotel rate creation and distribution

RatePublisher eliminates the frustration of backlogged rate updates by distributing hotel rates in the major GDSs. Once you subscribe to PropertyVault and use the fully integrated RatePublisher solution, you complete the corporate RFP cycle by pushing your negotiated rates back into your CRS or directly to the GDSs.

Publish rates accurately and easily

Generate More Revenue

Drive more revenue to your hotels by ensuring accurate rates are published to the major GDSs in a timely manner. With RatePublisher, there are no more "surprises" for customers trying to book their negotiated rates.

RatePublisher is a hosted ASP application that reduces the implementation time and cost associated with GDS connectivity. Reduce the number of rejected messages caused by inconsistent rates, which enables rate and reservations staff to spend time analyzing rates instead of doing manual data entry.

As a subscriber to PropertyVault you can store media files of any type including text, images, audio/music, video, and animation.

Reliable

Lanyon is the recognized leader in content management and process improvement solutions for the hotel industry and their partners. From GDS rate publishing and productivity tools to the latest Internet innovations, Lanyon products can be found in major travel-related companies worldwide. Let us help you publish your corporate and consortia rates and other content. Call us today to speak with our sales and marketing team, or email sales@lanyon.com.
